ST Imaging ViewScan 4
On-Board PC Option

Pictured: *Back of ViewScan 4 with On-Board PC Attached to Base*

Turn-Key Solution

ST Imaging is proud to offer a turn-key solution when replacing old microfilm reader/printers. The ViewScan 4 Microfilm Scanner can come with an optional on-board that is securely connected to the base of the scanner.

Work Directly From the Box!

Now, an on-board PC allows your ViewScan 4 to be working direct from the box! No need to download software when your on-board PC is preconfigured with Windows 11 and all your PerfectView and Premium features. Simply connect a monitor, keyboard and mouse to the PC and you are ready to scan!

Smaller Footprint for a Cleaner and Efficient Workspace

The on-board Mini PC works as a desktop PC that doesn't occupy any desk space. The mini-PC is small in size and can easily be mounted to the back of the scanner. The Mini-PC is a significant advantage in situations where space is limited or you want the micro-pc stored out of sight from patrons.
